

PulseCheck Mobile

Break away from the workstation. ED care at your fingertips!

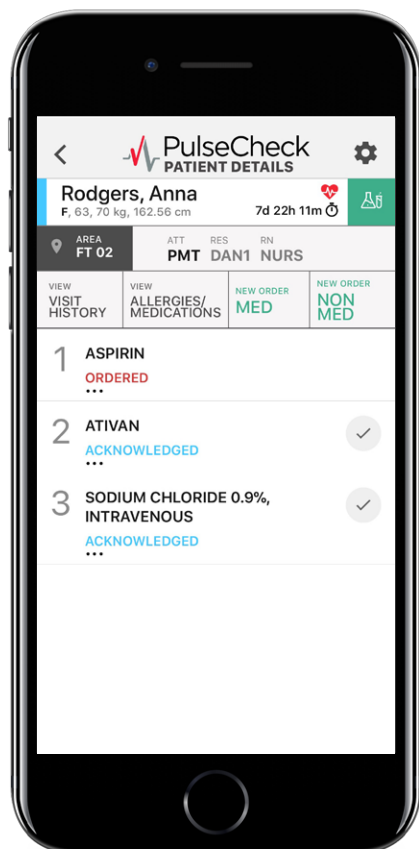

The **PulseCheck Mobile** app is the ideal companion for clinicians and ED staff using Harris PulseCheck. Whether placing orders, viewing results, or simply changing a patient location, the PulseCheck Mobile app brings an array of features and functionality to a smartphone or tablet.

More than 80% of physicians use smartphones and medical apps. PulseCheck Mobile was designed by, and for, ED clinicians to help facilitate more frequent face-to-face patient care at the bedside, with less time spent in front of a computer.

- ✓ **Simplified Patient Tracking**

- ✓ **Secure within your facility’s network**
- ✓ **Quickly authorize/deauthorize users and devices**
- ✓ **No PHI stored on device**
- ✓ **Available for iOS and Android**

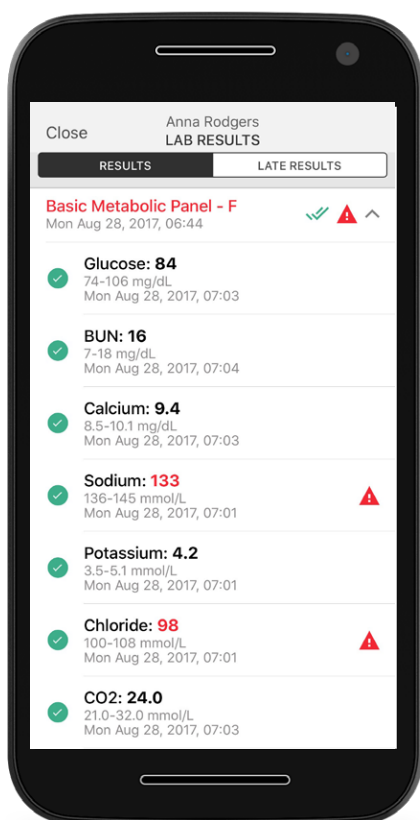

ED PulseCheck® is the high-performance ED EMR (emergency department electronic medical record) that helps hospitals improve quality of care measures in the ED. It delivers a complete set of operational and management tools that help optimize ED performance as well as provide interoperability with the hospital's EMR and the health care community through a health information exchange (HIE).

In addition, ED PulseCheck offers charge capture and full clinical documentation functionality, helping clinicians better manage ED workflow, drive clinical quality, improve financial performance and use the information provided to help facilitate quality of patient care.

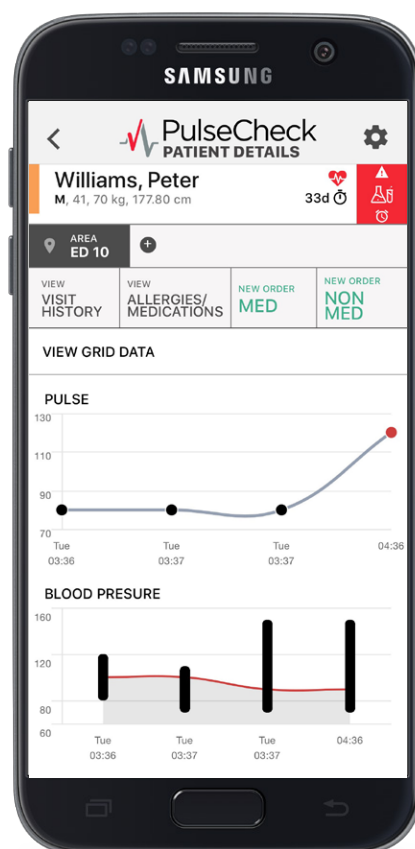

Order Entry

Order medications, labs and diagnostic imaging quickly and easily.

Results

View, enter, and receive notifications of critical results.

Patient Details

View patient vital signs.
