

PulseCheck

Powering performance in Canadian emergency departments

Departments using PulseCheck can significantly optimize tracking and triage, discharge and reporting processes.

Standard Canadian PulseCheck EDIS Package includes:

eCTAS Triage integration with Application Complex		Home Medications and Allergies tracking	
PIA times (as well as RN and other provider capture)		Prescriptions (including allergy and drug interaction checking)	
Tracking, including location, LOS, CEDIS, OHIP, CTAS, Dispo. and others		Customizable ED dashboard for key performance metrics	
EMS off-load times, as well as Police transported patient tracking and reporting		Publish Emerg. wait times internally and externally	
Disposition and Diagnosis (OHIP mapped Dx. as well)		Capture and Report ERNI and NACRS data	
OHIP and other Provincial Dx and Procedure codes tracking and reporting		ADT integration with hospital HIS system	
Discharge Instructions		Results and Order status integrated and viewable within PulseCheck ED®	

PulseCheck ED® is a high-performance complete EDIS solution that helps Canadian hospitals meet the needs of their busy Emerg. Departments. The PulseCheck ED modular implementation model allows for an economical solution to meet hospitals' immediate eCTAS and EDIS needs. From CTAS levels to CEDIS complaints, OHIP procedure codes to Health Insurance Card tracking, Canadian Emerg. Departments using PulseCheck can significantly optimize tracking and triage, discharge and reporting processes.

Simplified patient tracking, triage and eCTAS

Currently partnered with early adopters of the eCTAS initiative, PulseCheck ED will support the application complex workflow. Efficiently managing patients throughout their stay in Emerg., PulseCheck ED's fully integrated tracking board provides key patient information, such as CEDIS complaint, CTAS score, length of stay, OHIP billing status, infectious disease and more. PIA times are seamlessly captured and reported, and can be automated via integration to RTLS (Real-Time Location System) products.

Dedication to our customers

PulseCheck values customer input and collaboration above all. All Canadian specific features have been developed from a commitment to meet the requirements of our customers in Canada. These features are a direct result of customer input on our Product. We believe in a hands-on expert approach to implementation. That's why every implementation gets a dedicated team with years of experience implementing PulseCheck in Canada.
