

PulseCheck ED Electronic Health Information Export - 170.315(b)(10)

PulseCheck ED allows EHI export for a single patient and for a patient population. The recommended data export format is CCD 2.1.

Documentation of format details is available at

https://www.hl7.org/documentcenter/public/standards/dstu/CDAR2_IG_CCD CLINNOTES_R1_DSTU2.1_2015AUG_2022Sepwith_errata.zip

Single Patient:

For a single patient, a user with appropriate admin permissions may perform a manual EHI export as follows:

1. From the All Menu click Archive and search for patient

2. Choose a patient visit and select Chart Coding from All Menu

Type	Code	Status	Description	Qty	Charge Date
Charges (6)					
<input type="radio"/>	SVC ACET 00147	Active	Acatone		March 18, 2014 13:14

3. On Chart Coding Click Send CCD.
4. Repeat this process for all the patient's visits.

Patient Population:

PCED also has the capability to export EHI for an entire patient population upon request. Multiple formats are supported including CCD, csv, and machine-readable pdf. Please contact your PulseCheck representative.
